

The histogram displays the frequency distribution of the variable 'data'. The x-axis, labeled 'data', ranges from 0 to 4. The y-axis represents the frequency, with a maximum value of approximately 100. The distribution is highly right-skewed, with a very high frequency at 0 (approximately 100) and a long tail extending to the right. The frequency drops sharply for values greater than 0, with a few small peaks at 0.5, 0.7, 1.0, and 4.2.
