

A histogram showing the distribution of the variable 'data'. The x-axis is labeled 'data' and ranges from 0 to 12. The y-axis represents frequency, ranging from 0 to 10. The distribution is highly right-skewed, with a very high frequency (approximately 10) at the value 0. The frequency drops sharply for subsequent values, with a small peak around 2 and a few isolated bars at higher values (around 6 and 12).
